CENTRAL INTELLIGENCE GROUP INTELLIGENCE REPORT

COUNTRY Germany/Russian Zone

DATE: 25X1X6

INFO. [REDACTED]

SUBJECT Research Groups in Berlin-Köpenick

DIST. 31 October 1946

25X1A6a

PAGES 25X1A2g

ORIGIN [REDACTED]

25X1X6

1. The Hohen Schönhausen research group which has now moved to the Gema buildings in the Wendenschloss-Strasse at Berlin-Köpenick is still headed by Dr. Tröger.
2. Dr. Tröger's group specializes in research on remote control of rockets. Preparatory work is almost completed and practical tests are expected to take place in September or October 1946. These tests may take place in the U.S.S.R. and will probably entail the removal there of the German research team.
3. It is believed that the former methods of controlling the flight of "V-2's" are being retained with slight modifications only, i.e., a directional beam is used, the range measured and thrust reduced or increased according to the distance to be covered.
4. A second group at Köpenick is working in the sphere of radar stations proper. Its activities are "mainly directed" by Dr. Buschbeck.
5. A third group under the leadership of Wilke (ex-"Freya" expert) is concentrating on P.P.I. (for radar reception) work.
6. Tröger and Buschbeck are said to be collaborating whole-heartedly with the Russians and to have said "this time we are at last on the right side".
